Create API key

Name *

YouTube API key 1

Use a unique name to identify your API key

APIs that can be accessed using this key

Service account required: To use Agent Platform API or Gemini API, you must create an authorization key (auth key) by binding this API key to a service account. The option to bind will appear once you select either API.

Note: An organization policy governs creating API keys bound to a service account for projects with a Google Cloud organization. Learn more
